

This mattress features flame retardant, abrasion resistant, cut-resistant, and puncture-resistant properties to ensure safety and durability. Additionally, the CPR Strap quickly deflates the mattress with single-handed operation, while the 8" air cells provide better immersion and enhanced pressure care performance. The nylon PU quilted comfort cover also wicks away moisture from the surface to aid in microclimate management. Finally, reducing tripping hazards is essential for a safer healthcare environment - which is why the Ventilated low-air-loss-cells wicks moisture & heat away to minimise the risk of tissue deformation - use this QR code for manufacturer's information>>
